- Mastery of design patterns, agile methodologies, among other methodologies, among other design concepts
- Handling of prototyping applications such as figma and XD

High School
Instituto Nuestra Señora de Fátima, 2016-2020
- UTN degree in Advanced Word and Advanced Excel.
- First contact with visual basic programming

I am a programmer able to manipulate, develop and maintain digital products, with emphasis on web production.

With capabilities to develop the frontend from REST API management to the design of the digital product with notions of UX/UI.

I can also handle the backend creating an API, doing user management, among other things.

But a developer not only has to be differentiated by their technical skills, so I like to emphasize that I am a person who loves teamwork, which is based on respect always, above all.

Always eager to learn new technologies and eager to move forward.

My Skills

Technologies
- HTML
- CSS
- Bootstrap
- Javascript
- Python
- Git Y Github
- Linux (Intermediate)

Frameworks
- Next.js
- Node.js
- Django
- React Native
- React.js

Applications
- Figma
- VsCode
- Postman
- MySqlServer
